

G2-M2-Lesson 1

1. The length of the picture of the shovel is about 8 centimeters.

I need to count the number of centimeter cubes between the endpoints. Then, I can find out the length of the picture in centimeters.

2. The length of a screwdriver is 19 centimeters. The handle is 5 centimeters long. What is the length of the top of the screwdriver?

I can use the Read-Draw-Write process to solve. I can draw a screwdriver and label the whole length 19 cm. This is just like lining up my centimeter cubes! I know one part is 5 centimeters, so I'll label that. I can use addition to solve for the unknown part, which is 14 cm. I can write a complete statement of my answer.

*The top of the screwdriver is 14 centimeters.*
